

Due to the COVID-19 pandemic, and to ensure the health and safety of our patients and staff, the Foot Doctors will be making changes to our daily schedule. We are going to decrease the number of patient visits daily, to keep the waiting area from becoming crowded. Patients with emergent problems, infections, and post op surgical care will be given priority and non-emergent issues may be rescheduled.

We are making every effort to keep the office low in contaminants by following the guidelines from the Public Health Department. Each exam room will be thoroughly cleaned with anti-viral disinfectant after every patient encounter. We will wipe down “high touch” surfaces throughout each day. At the end of every day, all surfaces, door handles, knobs, etc, will be wiped down.

Please help us keep the office safe, by rescheduling your appointment if you are experiencing any cough, fever, or just feeling ill.

We apologize for any inconvenience this may impose, however the health and safety of our patients and staff is the priority.

Sincerely,

Nicole Surdock, CEO

The Foot Doctors
